

## sync•gw testing

We provide possibilities to test **sync•gw** synchronization using the following applications:

- [MySQL](#)
- [RoundCube](#)

Please notice the following limitation in our test environment:

- [Data size limitation](#)

We've limit the size of each data record (e.g. one contact record) to 10MB. This may led to records not being synchronized (e.g. a contact record with a 12MB picture attached will not be synchronized).
