

## User registration

Please enter user details below. As a registered user you are able to post in our [Forum](#).

**sync•gw** licenses are created based on your **First name, Last name** and **E-mail address**. In case you later want to purchase a software license on behalf of someone else, enter the personal or institution/department name of the recipient of the software instead of yours. If possible, avoid special characters like national accents in the data you enter.

Take special care about the fields **First name, Last name, E-mail address, User name, Country** and **EU sales tax ID number** - after successful registration those fields are protected and cannot be modified.
